

NMR01

NON-MAGNETIC AND NON-REFLECTIVE TRIPOD
FIBERGLASS lighter but stronger than wood
and not affected by humidity

100% METAL FREE

The “non-magnetic and non-reflective” tripod NMR-01 allows to place antennas and measuring instruments in every environment with no problem of interference, reflection, magnetic attraction or humidity. The tripod is built with non-metallic material, in order to be usable in anechoic chambers and MRI. The NMR-01 is solid, suitable for all environments, extendable up to 2 m, lightweight and easy to carry. All these features make it a greatly innovative tripod for EMI-EMC, RF and EMF measurement. Compliant with the IEC 61 786 directive, where it is required to perform EMF low frequency measurements not affected by humidity.

NMR-01 is used to place antennas (log periodic, biconical, horn, rod) and measuring instruments (electromagnetic field meter, low frequency sensor, shielding effectiveness meter) in environments where metal is not allowed.

MRIs, anechoic chambers, industrial sites and outdoor
